Atlanta, Ga. – Richardson Technology Systems (www.RichardsonTSI.com) announces its “Classrooms of the Future” contest to raise awareness of the positive difference technology is making in the learning process. The contest is open to metro Atlanta fifth and sixth grade classes that submit original pieces of artwork representing technologically inventive classrooms.

“Many of the teachers and students in Georgia use our learning tools every day,” says Richardson TSI CEO Joseph Ciotti. “With ‘Classrooms of the Future,’ we hope to inform everyone how important technology is to the learning process.”

With technology systems that help raise graduation rates and improve test scores, Richardson TSI hopes the contest will help others understand the crucial function of technology in today’s schools. Richardson will provide LearningSoft’s flagship wireless student response handheld platform, the Indigo Learning System, in the winning student’s classroom and will showcase the chosen submission on a traveling exhibit throughout Georgia. In addition, three classrooms will receive honorary prizes of TeachLogic’s Quantum system, an infrared wireless communication device ideal for classrooms.

-more-

Submissions should be sent to 70 Crestridge Drive, Suite 100 Suwanee, GA 30024, Attention: Tracy Novak by January 18, 2008. For more information or to enter the contest please visit www.RichardsonTSI.com.

About Richardson Technology Systems

For more than 40 years, Richardson Technology Systems has been providing education, healthcare, government, and select commercial facilities in the state of Georgia with integrated technology solutions. Richardson's solutions improve learning and enhance safety for schools, improve the way their customers communicate, and provide patient safety and operational efficiency for hospitals. From planning and design to implementation and service, Richardson works closely with their customers to provide integrated systems that meet their clients' needs. Their comprehensive solutions include intercom and telephone communication systems, data networks, fire alarms & security, and multimedia management and curriculum solutions for schools, as well as nurse communications, asset tracking, infant protection, and medical lighting. For more information, visit www.RichardsonTSI.com.

About Learning Soft

LearningSoft, a member of the Jacoby Group, produces affordable wireless computing platforms for education. Its flagship product, the Indigo Learning System, is a network of handheld computers developed specifically for assessment and instruction. Indigo provides instant feedback for educators to guide classroom decisions and ensures that students achieve success on "high-stakes" standardized exams.
